PRACTICAL 8A: Nearest Neighbour Analysis

SOLUTION:
Add vector layer: ne_10m_populated_places_simple
Add text Delimited layer: earthquakes_2021_11_25_14_31_59_+0530.tsv (AKA signif.txt)

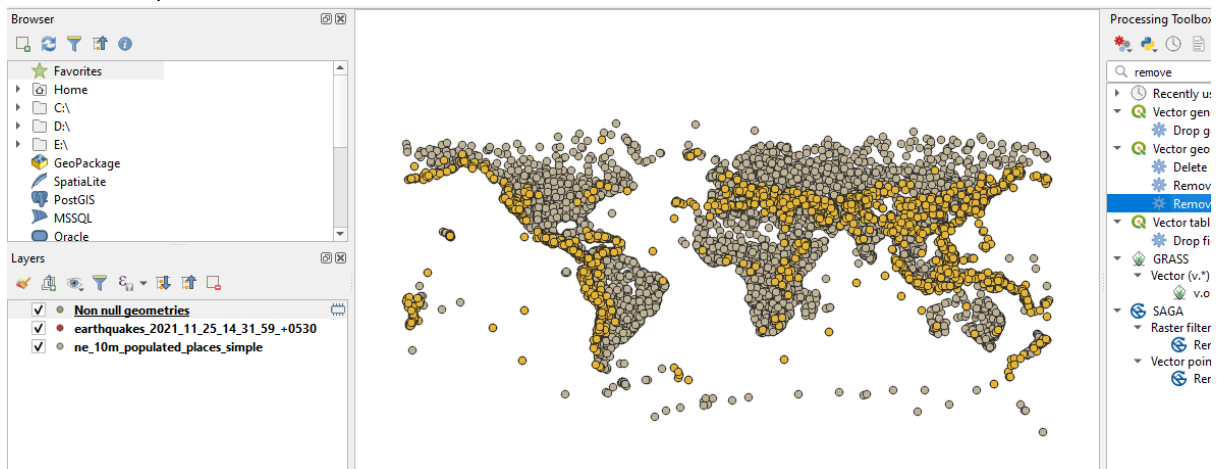

Press **ctrl + alt + t** to open toolbox and search for Remove null geometrics
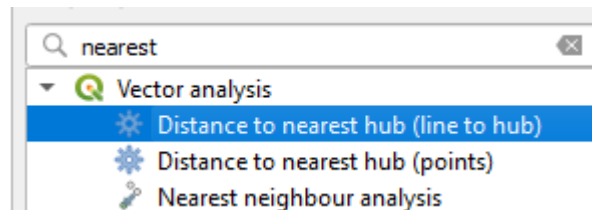

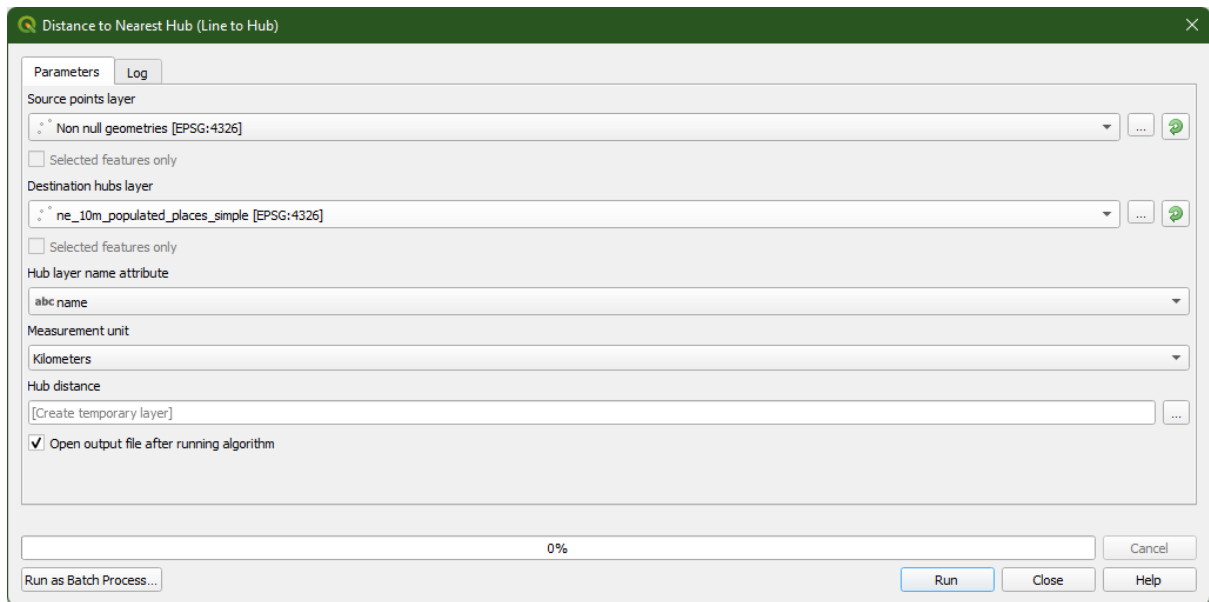

Hit and run :)

Now in toolbox search for Distance to Nearest Hub (line to hub)

You can save the output file if you want to (Save in gpkg format), then again hit run.

OUTPUT
